

# SUPER COMPACT 27mm Conversion Lens

## M27 0.45x Ultra Wide Super Compact Lens

Professional Quality

**Ultra Compact !!!**

### DSL-245S (27mm)

Specially designed for mega-pixel digital still and video cameras, the M27 0.45x Ultra Wide angle conversion lens assist to capture the best quality pictures and video with true mega pixel sharpness without the unpleasant view of distortion, vignette, reflection or flare. All these are only made possible by a superior system of 2 element multi-coated high quality lens which seeks to maximize the true potential of your digital images and videography.

Most often, due to the limitation of the focal length, digital images captured by either digital still cameras or digital video cameras are not able to "widen" to include dynamic scenic view of landscape or group photography within a foreground of beautiful mountains, ancient buildings, historical buildings etc.

The M27 0.45x Ultra Wide angle digital conversion lens aims to resolve the above shortcoming by enabling the focal length of your digital video and still cameras to shorten by a factor of 0.45x, meaning a more dynamic wider view can be captured in a single image or within a short timespan during videography.

In technical terms, for example, at an original focal length of 35mm, when combined with the M27 0.45x Ultra wide angle conversion lens, will produce a new extended focal length of 15.8mm – an ultra wide angle with an approximate diagonal angle of view at 110 degree.

### Technical Specifications

Magnification:	Ultra Wide 0.45x
Element/Group:	2E / 2G
Barrel Finishing:	Titanium
Lens Coating:	Multi-Coated
Rear Mounting Thread:	27mm
Height:	2.0cm
Weight:	30g

### Suitable for:

#### JVC Digital Camcorder

1. GR-DX27 / DX28 / DX37 / DX48
2. GR-DX57 / DX67 / DX77 / DX97
3. GR-DX107 / DX307 / DX317
4. GR-DVX48 / DVX78
5. GR-DVX507 / DVX707
6. GR-D200 / D201 / D230

#### Panasonic Digital Camcorder

1. NV-GS11 / NV-GS15 / NV-GS22
2. NV-GS33 / NV-GS55
3. NV-DS60 / NV-DS65

### Vignetting

Vignette Free  
Digital Image

### Mega Pixel Image Quality

Superior clarity and mega pixel image reproduction

### Included Accessories

Soft Case & Plastic Caps

### PRO Optical System

2 element / 2 glass optical system

### Ultra Compact Size

Weighed only 30g & 2.0cm in height

### Lens Coating

Multi-Coated Optical Glass Lens
